

MUDATHER MOHAMMED

Machine Learning (AI) Engineer (Hybrid) Candidate | Git, Python, Pytorch

mudatherkbyer@gmail.com • [LinkedIn](#) • [GitHub](#)

Junior AI Engineer with hands-on experience building Machine Learning, Deep Learning, and AI-powered applications using Python. Experienced with NumPy, Pandas, Scikit-learn, TensorFlow, LLM APIs, AI Agents, FastAPI, Supabase, and Vercel. Built ML models, neural networks from scratch, AI lead-discovery systems, and end-to-end software applications. Currently advancing in PyTorch and AI Engineering through professional certifications and practical projects. Targeting the Machine Learning (AI) Engineer (Hybrid) position at Jobs Ai to deliver robust, data-driven solutions.

TRAINING AND CERTIFICATIONS

- **Machine Learning Specialization** — [Stanford / DeepLearning.AI](#): Completed — Supervised Learning, Regression, Classification, Gradient Descent, Regularization, Decision Trees, Model Evaluation, and practical ML workflows.
- **PyTorch Professional Certificate** — [DeepLearning.AI](#): In Progress — PyTorch fundamentals, neural networks, training workflows, deep learning, and practical model development.
- **AI Engineering Professional Certificate** — IBM: In Progress — AI Engineering, Machine Learning, Deep Learning, and AI application development.
- **AI Engineering** — Scrimba: Completed — Professional development in modern AI application development and LLM-based applications.
- **Crash Course on Python** — Google: Completed — Python programming fundamentals, functions, data structures, and practical programming.
- **Google Cyber Security Certificate** — Google: Completed — Includes Linux, MySQL, and Python hands-on labs.

TECHNICAL SKILLS

- **Programming:** Python, SQL, Git/GitHub
- **Machine Learning:** Scikit-learn, Linear Regression, Logistic Regression, Gradient Descent, Classification, Model Evaluation, Regularization, Feature Engineering
- **Deep Learning:** Neural Networks, TensorFlow, CNNs, PyTorch (In Progress)
- **AI Engineering:** LLM APIs, AI Agents, Prompt Engineering, AI Applications
- **Backend & Deployment:** FastAPI, REST APIs, Supabase, Vercel
- **Data:** NumPy, Pandas, Matplotlib

PRACTICAL PROJECTS

• IntentFlow :

AI Lead Discovery System Freelance / AI Engineering Project: AI Agent Project: Built an AI agent concept that analyzes Reddit posts to identify potential buying intent and users requesting help. Designed an automated workflow for post analysis, intent detection, lead identification, and AI-generated reply suggestions.

Designed for integration with the Reddit API for automated data collection.

Technologies: Python, LLM APIs, AI Agents, Reddit API.

• Neural Network Implementations :

NumPy

NumPy.

• TensorFlow :

• PyTorch :

Implemented a neural network from scratch using NumPy to understand forward propagation, weights, activations, and neural network fundamentals. Built and trained a neural network using TensorFlow. Currently rebuilding and extending neural network projects using PyTorch.

Implemented a neural network from scratch using NumPy to understand forward propagation, weights, activations, and neural network fundamentals.

Built and trained a neural network using TensorFlow.

Currently rebuilding and extending neural network projects using PyTorch.

Repository: https://github.com/mudather490/Nurons_network-projects.git

- **House Price Prediction — Linear Regression :**

Linear Regression : Built an end-to-end Machine Learning project for predicting house prices. Applied data cleaning, EDA, feature selection, train/test splitting, Linear Regression, evaluation, visualization, and model persistence. Evaluated the model using MSE and R^2 .

Built an end-to-end Machine Learning project for predicting house prices.

Applied data cleaning, EDA, feature selection, train/test splitting, Linear Regression, evaluation, visualization, and model persistence.

Evaluated the model using MSE and R^2 .

Repository: https://github.com/mudather490/House_Price_model_linearregression.git

- **FinanceTracker — Python :**

Python : Built a command-line application for managing personal income and expenses. Implemented adding, searching, viewing, deleting, and calculating expenses using Python and OOP.

Built a command-line application for managing personal income and expenses.

Implemented adding, searching, viewing, deleting, and calculating expenses using Python and OOP.

PROFESSIONAL EXPERIENCE

Freelance Software & AI Developer. AI & Software Engineering : Developed practical software and AI applications combining machine learning, AI APIs, backend development, databases, and deployment — Independent / Freelance | Recent

Experience includes :

- Building AI-powered applications.
- Integrating LLM APIs into applications.
- Developing AI agent workflows.
- Building backend services using FastAPI.
- Integrating applications with Supabase databases.
- Deploying web applications using Vercel.
- Connecting frontend applications with backend and AI services.
- Developing IntentFlow, an AI-powered lead discovery concept.

ADDITIONAL BACKGROUND :

Transitioned from a background in Veterinary Medicine into Software Engineering, Machine Learning, and Artificial Intelligence.

TARGET ROLE

Remote Machine Learning (AI) Engineer (Hybrid) at Jobs Ai
